What's New In?

Q: LINQ to SQL with DateTime field I'm facing a very strange problem with LINQ to SQL. After creating a LINQ to SQL class, i'm trying to display on screen a datetime field, but i have a problem with the query. public IQueryable SelectAll() { return from c in this.Context.Set() select c; } I check the database with a previous query (when the datetime field was Nullable (datetime = null)) and all is good. My question is how can i manage the nullable attribute? A: Doing what @Frederik suggested, worked fine for me. However, you need to add the call: Where(c => c.CompteDateTime == null) I was trying to select all null fields, which is what the query originally looked like. Q: How to set content type in browser file extension? For example, if I create a file with the extension "brvf", how can I set its content type to "application/vnd.geo.brvf"? I mean, how can I associate an mime type to a file extension? A: The question is probably more useful for the server than the browser. But... On the server, the default is determined by the HTTP response headers and with a standard web server like apache it will set the content type to 'text/html'. You could use htaccess to set a custom content-type header but this is usually not a good idea. If you're using IIS you can use the ApplicationMimeMap directive. Q: Sending a Secure Message across a Network I am trying to develop a messaging app using socket programming. The server and the client have to transfer a message. I am sending them through the server network. Is this secure? Will the message be received in the same machine or anyone with the same IP that listens to this IP will receive this message and understand the message? The message should be send over a network. A: Yes, it is secure. You don't need to worry about it. Your

System Requirements:

CPU: Intel Core 2 Quad RAM: 1 GB Hard Drive: 300 MB Graphics: 32 MB compatible DirectX 9 graphics device Wi-Fi: 802.11b Additional Notes: In the following screens, there are hidden weapons that can be unlocked. Hidden weapon tutorial, found in the following screens, will teach you how to unlock them. Place 5,000,000 Crates for the newest of the new weapons to appear. Once they are unlocked, use the new weapon. Use Valknut to
