What's New in the Batch PDF Burst?

Batch PDF Burst is a handy utility designed to enable you to burst your PDF documents easily. The application features a layout similar to Microsoft 2010 Office. The program offers time saving batch file processing for handling large numbers of files easily. The application is suited for both novice users and the more advanced users that are new to batch processing to burst large numbers of PDF files for fast and easy uploading. Batch PDF Burst supports the batch processing of many files, PDF files and supporting non-PDF files. The application supports the proper parsing of PDF files. You can either select a single PDF file or a range of files that you have stored in the selected folder. You can have the files processed in any order you choose. You can even specify a generic

processing mode so that Batch PDF Burst does not process certain files in that mode. The application can process one or multiple files per page. The software does not require administrative rights to run. Batch PDF Burst offers a special batch processing mode which can be used to batch process PDF files without the need to select each file one by one. This mode automatically merges several selected PDFs into one file for fast processing. The program enables you to compress PDF files using the strongest compression algorithm that you choose. The application supports the following compression schemes: ZIP, RAR, JAR, UNZIP and 7-ZIP. Batch PDF Burst includes FTP support for uploading the processed file to the website you choose. You can either choose the FTP protocol or connect directly to the FTP server using the FTP protocol. There is no need to maintain the ftp server credentials. Download the Batch PDF Burst Utility is free for Windows PC users to use as they need. Download Batch PDF Burst Utility Batch PDF Burst is the best utility for batch processing multiple PDF files.
