Q: How to remove specific file extensions in apache2 logs? I was asking myself if there is any possibility to remove file extensions from the apache logs. I have no problem with removing full

URLs but would also accept removing file extensions from the LogFormat line like: LogFormat "%h %l %u %t \"%r\" %>s %b \"%{Referer}i\" \"%{User-agent}i\"" combined So if a request comes with i want to get rid of.txt and replace it by something like foo.bar/aaa.bbb.ccc.d.ddd. As soon as i found something on google, i could not find anything useful. A: Is this what you want?
